

Technology & Strategic Planning

The right technology solutions are those that form an integral part of the schools strategic plan and were designed from the classroom perspective.

These solutions are reliable, cost effective, valued by staff and contribute to student outcomes and staff wellbeing.

What is generally provided?

Strategic planning that includes technology and certain outcomes

Establishment of the appropriate school based committees where such committees do not already exist

Technology design from the classroom focusing on teaching needs

Cost minimisation where acceptable

A suite of policies and procedures to help those that manage technology infrastructure to produce results reliably with maximum up times greater than 99% as well as equitable access.
